

Advanced Imaging Techniques in Microscopy

An intense 5-day workshop providing a theoretical and practical overview of advanced microscopy and image analysis techniques for life science students, *Ph.D.* students, postdocs and technicians.

April 16th – 20th 2018

Life Imaging Center (LIC), Center for Biological Systems Analysis (ZBSA)
Albert-Ludwigs University Freiburg
Habsburgerstr. 49, 79104 Freiburg im Breisgau

Organization: Microscopy and Image Analysis Platform (MIAP) & Life Imaging Center (LIC)
Instructors: Dr. Roland Nitschke, Iris Bierschenk, Elitsa Bodurova, Sabine Haxelmans, Dr. Angela Naumann, Tobias Wernet

Day 1: April 16th, 08:30 – 18:00	
08:30 – 09:15	Introduction: General workshop introduction; Overview of imaging methods
09:15 – 10:30	Lecture: Introduction to microscopy: History of microscopy, properties of light, microscope types, objectives, parfocality, refractive index, resolution, contrast methods, illumination and alignment
10:30 – 10:45	Break: Coffee and Tea
10:45 – 12:30	Practical: Working at imaging systems (handling, alignment and troubleshooting); Working with resolution test target and live cells; Recording of first 3d series
12:30 – 13:30	LUNCH BREAK
13:30 – 14:30	Lecture: Immunofluorescence labeling, sample preparation, cover glasses, mounting media and general pitfalls of sample preparation
14:30 – 16:00	Practical: Working at LSM systems (handling, alignment and troubleshooting); Working with resolution test target and live cells; Recording of first 3d series
16:00 – 16:15	Break: Coffee and Tea
16:15 – 17:00	Demo: Software ZEN blue and ZEN black, making movies
17:00 – 18:00	Analysis: Making first image montages; Quantitative analysis of images: intensity, area, S/N

Day 2: April 17th, 08:30 – 18:00	
08:30 – 10:30	Lecture: Fluorescence microscopy, CCD-cameras, confocal microscopy, point spread function, pinhole settings, 2D / 3D acquisition parameters
10:30 – 10:45	Break: Coffee and Tea
10:45 – 12:30	Practical: Recording of bead images on imaging setups; Factors regarding image quality, binning, averaging, summing, pixel time, illumination time, 3D stacks, z-distance; Recording of images and spectral information from fixed cells
12:30 – 13:30	LUNCH BREAK
13:30 – 14:30	Lecture: Dyes, Nanodots, optical filters, fluorescence spectra, spectral recording and special microscopy (2- photon microscopy, Nipkow based confocal, ApoTome, META-detector, Live, TIRF)

14:30 – 16:00	Practical: Recording of bead images on confocal microscopes; Factors regarding image quality, binning, averaging, summing, pixel time, illumination time, 3D stacks, z-distance; Recording of images and spectral information from fixed cells
16:00 – 16:15	Break: Coffee and Tea
16:15 – 17:00	Demo: Software ZEN blue, ZEN black, Imaris (Bitplane), Huygens (SVI)
17:00 – 18:00	Analysis: Analysis of experiments and data, generating movies, animations, collages and diagrams, preparation of final presentation

Day 3: April 18th, 08:30 – 18:10	
08:30 – 10:30	Lecture: GFP-Methods (FRAP, FRET, FLIP, FLIM, FLAP)
10:30 – 10:45	Break: Coffee and Tea
10:45 – 12:30	Practical: Live-cell experiments; TIRF, tiles, positions, and time lapse 4D
12:30 – 13:30	LUNCH BREAK
13:30 – 14:30	Lecture: Fluorescence live-cell labelling, cell volume measurements, microinjection, flash-labelling, caged dyes, dye loading, ion-sensitive dyes, ratio-dyes, combination of dyes
14:30 – 16:00	Practical: Live-cell experiments; FRET, photo-activation and –conversion, tiles, positions, and time lapse 4D
16:00 – 16:15	Break: Coffee and Tea
16:15 – 17:00	Demo: Software ZEN blue, ZEN black, Imaris (Bitplane), Huygens (SVI)
17:00 – 18:00	Analysis: Analysis of experiments and data, generating movies, animations, collages and diagrams, preparation of final presentation

Day 4: April 19th, 08:30 – 18:00	
08:30 – 09:30	Lecture: Superresolution
09:30 – 10:30	Lecture: Deconvolution
10:30 – 10:45	Break: Coffee and Tea
10:45 – 12:30	Practical: Live-cell experiments; TIRF, tiles, positions, and time lapse 4D
12:30 – 13:30	LUNCH BREAK
13:30 – 15:30	Practical: Live-cell experiments; FRET, photo-activation and –conversion, tiles, positions, and time lapse 4D
15:30 – 15:45	Break: Coffee and Tea
15:45 – 16:45	Open Q&A session
16:45 – 18:00	Analysis: Analysis of experiments and data, generating movies, animations, collages and diagrams, preparation of final presentation

Day 5: April 20th, 08:30 – 15:00	
08:30 – 10:00	Analysis: Analysis of experiments and data, generating movies, animations, collages and diagrams, preparation of presentation
10:00 – 10:15	Break: Coffee and Tea
10:15 – 12:00	Analysis: Analysis of experiments and data, generating movies, animations, collages and diagrams, preparation of final presentation
12:00 – 13:00	LUNCH BREAK
13:00 – 14:00	Presentations of experiments and data
14:00 – 15:00	Workshop wrap-up and feedback

- Please note that this preliminary agenda is for your information only and subject to changes.
