

MIAP Workshop Program 2018

© Gerit Linneweber
University of Cambridge

Applications and Solutions for Big Data in Life Science

Jointly supported by ACQUIFER (HIVE),
Bitplane (Imaris) and SVI (Huygens)

A 4-day workshop* utilizing the big data storage and analysis hardware platform HIVE from ACQUIFER together with the image analysis and visualization software package Imaris from Bitplane (2-day user training included)* and the deconvolution software package Huygens from SVI (2-day user training included)*.

May 15th - 18th 2018

For registration*, topics and a preliminary agenda please visit:

<https://www.miap.eu>

** The different workshop parts can be booked independently.*
